

THE SUNPOWER® 25-YEAR COMBINED POWER AND PRODUCT WARRANTY

The SunPower Difference

Since 1985, it's been the SunPower mission to provide the most reliable and efficient solar systems available. With more than seven million panels powering the globe, SunPower has proven the durability and reliability of its products. We credit our success to the unique design of our patented SunPower® Maxeon™ solar cell technology and our network of more than 2,000 expert partners whose top priority is keeping our customers powered. By offering the industry's first combined power and product warranty, we are underlining our continuing commitment to deliver the best solar experience in the market.

The Design Difference

SunPower Maxeon Solar Cell Technology

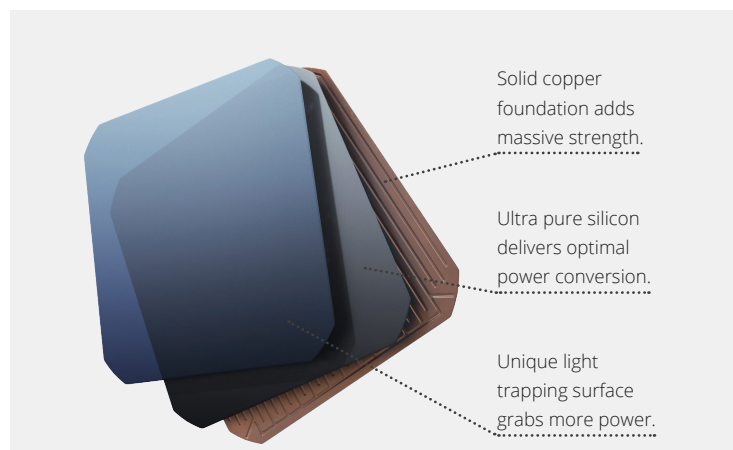

The design of SunPower Maxeon solar cells is unique because each cell is built on a solid copper foundation — providing the strength and durability to survive conditions that panels are subjected to year after year.

The SunPower Warranty

The Convenience of a 25-Year Warranty

SunPower is proud to offer a warranty as efficient and dependable as our technology. In the unlikely event you have an under-performing panel, SunPower will work with our partners to repair or replace and install it. With SunPower it's as simple as a phone call.

| Service Description ¹ | SunPower Panels | Other Panels |
|----------------------------------|-----------------|--------------|
| Removal of bad panel? | ✓ | No |
| Panel shipping? | ✓ | No |
| New panel installation? | ✓ | No |
| Product Warranty Term | 25 years | 10 years |

Solid copper foundation adds massive strength.

Ultra pure silicon delivers optimal power conversion.

Unique light trapping surface grabs more power.

SunPower Maxeon Solar Cell Technology

Conventional cells use a low-cost metal paste on the front and back-sides to conduct the power generated by the cell. SunPower Maxeon cells are built on a solid copper foundation.

Our unique design handles the additional power each cell generates, and makes it practically immune to the cracking and corrosion that causes standard solar cells to steadily lose power over time or fail completely.

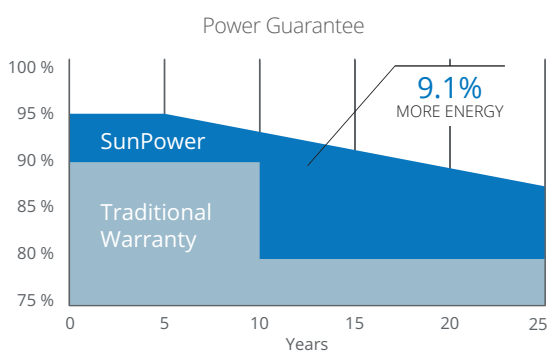

SunPower Simplicity

By combining power and product coverage in one warranty, we've eliminated concern about the difference between manufacturing defects and power output. We give you one combined warranty, with no fine print. If an issue ever arises with your solar solution, simply contact SunPower. Whether you work with a partner or contact SunPower directly, we will go above and beyond to restore your system as quickly as possible.

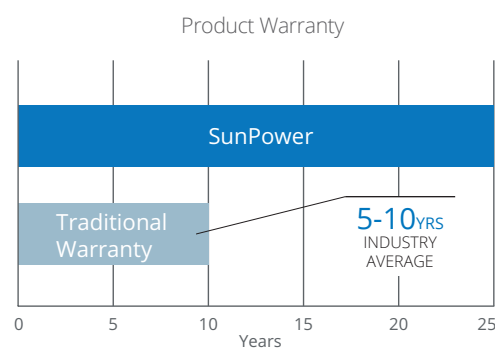

- With over seven million panels installed, fewer than 180 have not met our performance standards¹
- Our global network of more than 2,000 highly trained partners are available to serve you
- Our long-term financial stability ensures we will be there for you for many years to come

You're Covered

Our 25 year combined power and product warranty sets a new standard for the industry in overall coverage ensuring high performance and repair of under-performing panels.

- More lifetime energy: 9.1% above the industry standard
- More Power: at least 95% of the Minimum Peak Power for the first five years
- Less than 0.4% annual degradation for the subsequent 20 years

- The solar industry's first 25 year product and power warranty
- Warranty includes replacement costs²
- Financial stability and product reliability to back our commitment

Backing by SunPower gives you the peace of mind to know that your system is built with SunPower Maxeon solar cells and durable materials designed to withstand harsh conditions for decades. The SunPower combined power and product warranty represents our pledge to you that our panels are the best you can buy.

¹ All post-system-commissioning returns worldwide for panels built with Gen 2 Maxeon cells.

² Some exclusions apply. Please see the warranty for details.
